COMPUTER AIDED
DRUG DESIGN

This new book aims at providing the cutting edge finest knowledge regarding Computational Chemistry/Computational Biology to the upcoming Pharmaceutical professionals with some specific and special content attributes:

- Strictly follows the new Pharmacy Council of India (PCI) prescribed syllabus.
- All imperative contents of drug design like QSAR, Molecular Docking, Virtual Screening, Quantum Mechanics, Molecular Modeling, Molecular Dynamics, Databases, Drug Discovery, Drug Development, etc. are thoroughly covered in a comprehensive manner.
- Book written by experienced authors who have >10 yrs of in silico experience.
- Examination-focused to-the-point latest content with point-wise description of relevant matters in easiest possible language.
- High definition 2D-color figures, simple illustrations, descriptive flowcharts, tables, and hand-drawn diagrams in every unit for better understanding of the theoretical contents by the readers of Pharmacy and Allied Science streams.
- Frequently asked Multiple Choice Questions (MCQs), very short questions, short questions, and long questions in the end of every unit covered exhaustively.
- Last 3-Years Question Papers of various University Semester and Yearly examinations of Drug Design/Computational Chemistry/Computational Biology subjects for preparation.
