

Environment Protection Policy of Institution

Recently updated on: 16 Aug 2021

1. Every year 10 % reduction in use of papers.

Objective: To minimize use of papers. To become paperless institution by year 2030

Methods used:

- Reuse of used papers.
- Discouraging use of papers.
- Encouraging e-communication.

Methods for Impact Analysis:

- Analysis of paper consumption from stationary (store) section of institution.
- Statistical comparison on use of e-communication against use of papers for communication.

2. Every year 10% reduction in electricity consumption.

Objective: To minimize wastage of electricity consumption.

Methods used:

- Spreading awareness among staff members and students on minimizing wastage of electricity consumption.
- Monitoring mechanism to check on unwanted use of electricity.

Methods for Impact Analysis:

- Monitoring of electricity bill.

3. Rain water harvest.

Objective: To reuse harvested water.

Methods used:

- Implementation of mechanism for rain water harvesting.

Methods for Impact Analysis:

- Record keeping and continuous monitoring of reuse of harvested water.

4. Use of renewable energy

Objective: To reduce dependency on traditional energy sources, and to maximize use of renewable energy.

Methods used:

- Use of solar energy.

Methods for Impact Analysis:

- Installation of solar panels and reduction in electricity bill.
